Pedro Gil

GRAPE VARIETIES

Fernão Pires, Arinto e Marsanne.

VINIFICATION

Fermentation at a contrelled temperature of 18ºC.

STAGE

Without wooden stage

HISTORY OF WINE

The Passadiço wine is the result of a blend of several grape varieties produced in the Alenquer region. The vineyards, demanded on the slopes of the Serra de Montejunto and close to the ocean, were chosen protected from the Atlantic winds, offering an unequaled exposure to the sun, enabling the constant maturation of the grapes, making up for the production of more concentrated wines with a natural acidity.

REGION

LISBON

VINEYARDS

Wine from vineyards in the Alenquer region

TASTING NOTES

Fruity, fresh and balanced wine with vagetable notes that enhance its freshness.

GASTRONOMIC HARMONIZATIONS
